Projects

KPI Monitoring and Evaluation System – A web-based performance management platform that digitalizes KPI tracking, evaluation, and reporting. It enables organizations to monitor goals, analyze performance data, and improve transparency and decision-making. Contributed to backend development and database design, focusing on API development, data management, database architecture, and system functionality.

Wholesale Distribution System ERP – An enterprise-grade wholesale distribution ERP developed collaboratively with two friends. Unifies multi-warehouse inventory, procurement, sales orders, fleet logistics, dynamic pricing, and accounting across 18 integrated modules. Contributed primarily to frontend development and UI/UX, building responsive interfaces, dashboards, and intuitive workflows using modern web technologies.

NPQ Game – An online tournament platform that enables skill-based competitions, player rankings, and elimination-based challenges. Independently designed and developed the platform end-to-end, including the frontend, backend, real-time gameplay, authentication, tournament management, and player ranking systems.
